

IFR Molten Metal Splash Protection for Cold Weather Work (Outer Layer)

Barn Coats

EN373 Molten Splash Resistance - Molten Al Splash - Level D2
EN373 Molten Splash Resistance - Molten Fe Splash - Level E3
ASTM F1959 Arc Flash Rating (ATPV) HRC1 - 7.0 Cal/cm²

When your personnel must work outside in the cold weather, not only do they need to be protected from the hazards of the job, but from the elements as well.

Tri-Star Glove barn coats with molten metal splash protection are perfect for the job.

Proudly made
in the USA

Product Description

- The outer layer is constructed using 10oz HRC1 inherent flame resistant (IFR) Oasis™ 1000 which was designed specifically to shed molten metal. Available in Orange or Navy.
- Inside is a warm, soft layer of 10.75oz HRC2 navy fleece.
- Since the protective properties are inherent to the fibers of the fabric, they cannot be laundered out over the life of the garment, and will not burn, melt, or drip.

Will Not Burn, Melt, or Drip.

- These barn coats are very comfortable and comfort equals compliance.
- The 360° collar provides critical protection from molten pops and splashes as well as those blustery winds.
- Two inside chest pockets are big enough for most cell phones.
- The Twaron® knit wrist with thumb hole provides cut protection (A2) and locks the sleeve in place so it does not ride up the arm and expose the wrist to hazards or weather.

TSG-1087-1

Tri-Star Glove customizes garments for your industry needs.
