CutPro™ style 09TT371 can be laundered according to the following guidelines:

DRY CLEANING

·Perchloroethylene on regular cycle

INDUSTRIAL LAUNDERING

·Machine Wash 110°F
·Use liquid detergent
·Tumble Dry Medium (140°-160°F)

Comments:

1. No Chlorine Bleach. Chlorine bleach can cause rapid degradation of aramid fibers.
2. Use liquid detergent. Do not use soaps that contain animal fat.
3. Do not use fabric softener or dryer sheets. Fabric softener, starches and other laundry aides can coat the fiber and mask FR characteristics.
4. Fabrics may require pressing after laundering.
5. Shrinkage up to 5% may occur.
6. **Check with the garment manufacturer for specific instructions related to your garment.**

The information provided is based upon results of testing in a laboratory. While it represents up to date information regarding care and maintenance, no warranty is expressed or implied.

**Manufacturers of Industrial, Heat, and Cut Resistant Textiles Utilizing
High Performance Fibers**
