

# IFR Arc Flash Protection for Cold Weather Work (Outer Layer)

## Barn Coats

ASTM F1959 Arc Thermal Performance Value (ATPV) - 9.0 cal/cm<sup>2</sup>  
ASTM F1930 Mankin Test % Body Burn After 3 Sec. Exposure - 15  
NFPA 2112 Certified

When your personnel must work outside in the cold weather, not only do they need to be protected from the hazards of the job, but from the elements as well.

Tri-Star Glove barn coats with are perfect for the job when arc flash and flash fire are a threat.

### Product Description

- The outer layer is constructed using 7oz HRC2 inherent flame resistant (IFR) Tecasafe® Plus 700, which is a blend of FR Modacrylic, Lyocell, and Aramid. This fabric is designed specifically for professionals that may be exposed to arc flash and flash fire.
- Inside is a warm, soft layer of 10.75 oz HRC2 navy fleece.
- Since the protective properties are inherent to the fibers of the fabric, they cannot be laundered out over the life of the garment, and will not burn, melt, or drip.

### Will Not Burn, Melt, or Drip.

- These barn coats are very comfortable and comfort equals compliance.
- HRC2, in a silver heat transfer, is on the left sleeve for visual compliance.
- Two inside chest pockets are big enough for most cell phones.
- Each hemmed sleeve has an adjustment strap to help keep out the wind.

Proudly made  
in the USA

### Do We Customize? You Bet We Do!

- Prefer a Hemmed Sleeve? Or a Zipper to keep the wind out?
- Need a laydown collar to better accommodate the hoodie?
- 3M Retro-Reflective Hi-Vis striping provides extra visibility in low light conditions. Available in Yellow/Silver/Yellow, Orange/Silver/Orange, and All Silver.
- Interested in personalizing each coat? We can add your embroidered or heat transfer logo, specific department, and team member's name.
- If you need a fall protection flap, or mic loops? Just ask!

Let us know how we can customize our barn coats specific to your company.
