

IFR Arc Flash Protection for Cold Weather Work (The Base Layer)

HRC2 Base Layers

NFPA 70E-2004
Test Method ASTM F1959/F1959M
Arc Rating Ebt 11.7 Cal/cm²
Heat Attenuation Factor = 82%

Tri-Star Base Layers are inherent flame resistant (IFR) and provide arc flash protection. They are the perfect blend of comfort and protection to wear against the body, when creating the ultimate layered, cold weather work wear system. Wear them under our Barn Coat for extra warmth, or under our Hoodie or long sleeve tee once it warms up.

Layers of clothing provide protection and comfort. Wearing them under our barn coats or hoodies creates an insulating layer to help retain body heat and wick the sweat away.

Product Description

- Constructed using 5.5oz, inherent flame resistant (IFR), arc-flash rated blend of Kermel and Lenzing FR.
- The fabric is warm, soft, and comfortable.
- Since the protective properties are inherent to the fibers of the fabric, they cannot be laundered out over the life of the garment, and will not burn, melt, or drip.

Will Not Burn, Melt, or Drip.

- Also available in a 6.5oz fabric.

Tri-Star Glove customizes garments for your industry needs.
