

# Low Lint with Cut and Abrasion Protection

## TSG-153 Series

**ASTM F1790-04**  
**624.3 grams**  
**Cut Level 2**

Based on third-party testing

**EN 388**  
**1,000 cycles**  
**Abrasion Level 2**

Based on third-party testing

### Description:

The TSG-153 series is a 13-gauge, 100% para-aramid filament, silicone-free, low-lint glove. It has a 2" cuff with an overcast edge.

### Properties:

The distinctive yellow with green identification provides visual compliance.

The TSG-153 series cuff is overcast using a thermal heat-set yarn to minimize any errant particulate created by traditional surging. Cuffs are color coded by size for easy identification and visual compliance.

This series can be laundered, providing cost saving opportunities.

### Recommended:

The TSG-153 targets work areas requiring low lint with cut and abrasion protection while also providing dexterity. It works well for handling stamped edges in the paint process.

Product No.	Size	Cuff Color
TSG-153-XS	Extra small	Gray
TSG-153	Small	Yellow
TSG-154	Medium	Green
TSG-155	Large	White
TSG-156-XL	Extra large	Gray
