

Low Lint / Paint / Anti-Static

TSG-206 Series

Description:

The TSG-206 series is a 13 gauge, domestic polyester glove in black. It is made with Nega-Stat® for anti-static properties. It is silicone-free. It has a 6" cuff with an overcast edge.

Properties:

Solid black provides a sharp contrast to industry automotive products giving better product identification during application and quality control.

The TSG-206 series cuff is overcast using a thermal heat-set yarn to minimize any errant particulate used by traditional surging. Cuffs are color coded by size for easy identification and visual compliance.

This series can be laundered, providing cost saving opportunities.

Recommended:

The TSG-206 targets work areas requiring low lint and clean areas such as paint and engine departments.

Size	Cuff Color
Small	Yellow
Medium	Green
Large	White
Extra large	Gray
