

Low Lint / Paint

TSG-397-B Series

Description:

The TSG-397-B is a 13 gauge, reversible, silicone-free, heavy weight seamless string knit glove. It is made with domestic polyester and has a 2" cuff with an overcast edge.

Properties:

The consistent black color provides a sharp contrast to industry automotive products and debris, giving better product identification during application and quality control. The TSG-397-B series cuff is overcast using a thermal heat-set yarn to minimize any errant particulate used by traditional surging. This series is able to be laundered, providing cost saving opportunities.

Recommended:

Tri-Star Glove developed the TSG-397-B series for the demanding standards of the automotive paint environment. It has proven to be the glove of choice with our thermal X-yarn color-coded cuff edge.

It is also available in white domestic polyester, the TSG-397.

| Size | Cuff Color |
