Abrasion Level 1

3rd Party Tested

Product Description

- The front, sleeves and yoke are made using inherent flame resistant (IFR) #TS667 fabric, which combines Twaron® and stainless steel to create a high performance fabric that provides outstanding cut & puncture protection.

Proudly made
in the USA

Will Not Burn, Melt, or Drip.

- To provide breathability, the back below the yoke is made using black polyester mesh.
- The 360° collar provides critical protection for the vulnerable carotid artery. With an opening in the back of the neck and covered expandable elastic, once it's pulled over the head, the collar stays in place to protect the front and sides of the neck. And the team member is always in compliance.
- Adjustment straps at the waist accommodate a variety of body shapes.
- For additional abrasion resistance, a 23.5" x 10.5" replaceable Ara-Shield® belly patch is included. This is the same fabric found on the elbows and knees of firemen turnout gear and is affixed using hook and loop (use part number TSG-493-1 for replacement belly patches).
- The Twaron® knit wrist with thumb hole provides cut protection and locks the sleeve in place so it doesn't ride up the arm and expose the wrist.

gloves; it's right
in our name!**

**We have 7 gauge
gloves from A2 to
A9 and can ship
in 1-5 days.**

Replaceable Ara-Shield®
Belly Patch

To Be Sure,
Tri-Star uses Twaron® for its superior cut, abrasion,
and thermal resistance.

Tri-Star uses only 100% virgin Twaron®, as recycled para-aramids could compromise the
performance of the glove, and yarn could be inconsistent from shipment to shipment. For more
information on Twaron, visit <https://teijinaramid.com/en/products/>
